25X1

[redacted] photography indicates production of CLOD aircraft (AN-14) and the SS-N-2 (STYX) missile at Aircraft Plant 116, Arsenyev, USSR. For the first time CLOD aircraft (a total of 6) were identified at this plant. (The 2 previously reported probable CLOD aircraft 1/ have been confirmed as CLOD through mensural data.) The number and location of these aircraft within the plant area are evidence that Plant 116 is involved in the production of CLOD.

Thirty-two probable SS-N-2 (STYX) crates, aligned in 2 rows, have been identified in the south central section of the plant on [redacted] photography. The presence of these crates indicates that the plant is involved in the production of this short-range tactical missile.

25X1

A new large addition is being constructed on the east end of the final assembly hall; although incomplete, the new section measures 390 by 155 feet by [redacted]. This height is approximately 20 feet higher than the contiguous final assembly hall. Initial construction of the new addition was observed [redacted]. The adjacent new subassembly section was constructed [redacted].

25X1

25X1

25X1

Other aircraft observed [redacted] include: 2 CAB, 2 COLT (one is in the air), and 1 small straight wing.
